Deforestation: Causes, Consequences and Efforts to Control It

Control Measures for Deforestation. Tree plantation: The best way to fix the damage is to plant more and more trees. If a tree is cut for any commercial purpose, 10 trees should be planted simultaneously. Environmental organizations: We all should extend a helping hand to these organizations that support and replenish the environment. Money can be landed and voluntary actions can be organized ...

Effects of Deforestation on Biodiversity. Forests play host to a wide spectrum of wildlife. In fact, tropical rainforests are believed to be the most diverse ecosystems on the planet. Deforestation poses a grave threat to this biodiversity. On a local scale, the clearing of forest land can cause a decline in the population of certain species.

Deforestation - Causes, Effects, & Control (+FAQs & Video)

Among the other effects of deforestation, soil erosion is the most common one. The plant's roots actively engage in maintaining the topsoil and retaining moisture in it. Without forest life, the erosion of soil becomes evident, and it further hampers the water cycle causing unexpected climatic imbalances.

Desertification: Causes, Effects and Control! Desertification is taking place much faster worldwide than historically and usually arises from the demands of increased populations that settle on the land in order to grow crops and graze animals. It is land degradation occurring in arid, semiarid and dry sub-humid areas of the world.
