Fundament n°1:
Encapsulation. An
object is an hermetic
capsule. It contains its
own data and is
responsible for their
consistency. In this
context, we abolish the
global variables. The
goal is to avoid the
separation of data and
procedures: the
procedures are
responsible of data
consistency.

Design Patterns is a modern classic in the literature of object-oriented development, offering timeless and elegant solutions to common problems in software design. It describes patterns for managing object creation, composing objects into larger structures, and coordinating control flow between objects.
