On-board diagnostics (OBD) is an automotive term referring to a vehicle's self-diagnostic and reporting capability. OBD systems give the vehicle owner or repair technician access to the status of the various vehicle sub-systems. The amount of diagnostic information available via OBD has varied widely since its introduction in the early 1980s versions of on-board vehicle computers.

What the P0088 code means. P0088 is a OBD2 trouble code that tells us there is high fuel pressure found in the fuel system. This high fuel pressure is detected by the fuel pressure sensor located on the fuel rail. Once the high fuel pressure is detected the ECM causes a Check Engine Light to be seen on the dashboard of the vehicle.
