Mathematics (from Greek: μάθημα, máthēma, 'knowledge, study, learning') includes the study of such topics as numbers (arithmetic and number theory), formulas and related structures (), shapes and spaces in which they are contained (), and quantities and their changes (calculus and analysis). There is no general consensus about its exact scope or epistemological status.

Origami paper, often referred to as "kami" (Japanese for paper), is sold in prepackaged squares of various sizes ranging from 2.5 cm (1 in) to 25 cm (10 in) or more. It is commonly colored on one side and white on the other; however, dual coloured and patterned versions exist and can be used effectively for color-changed models.

Since L is the half-width of the roof, the load should be W, not W/2 and there are other serious things wrong with this. Firstly the tributory width d should be 3d as only every third rafter is tied; also the un-tied rafters push on the wall plates which span between the tied rafter ends bringing in 2/3 of the load on the tie and adding to the bending in the tied rafters.
