A computer monitor is an output device that displays information in pictorial or text form. A monitor usually comprises a visual display, some circuitry, a casing, and a power supply. The display device in modern monitors is typically a thin film transistor liquid crystal display (TFT-LCD) with LED backlighting having replaced cold-cathode fluorescent lamp (CCFL) backlighting.

### **Computer monitor - Wikipedia**

After filling in the readily available info, we have three more specs to solve for. The first one is the screen's dimensions in terms of width and height. The formulas for this — which I learned from an Omni Calculator page by Hanna Pamula — are fairly easy to use, and only require a diagonal measurement and an aspect ratio (AR).
