Unlocking The English Legal System
A SIM lock, simlock, network lock, carrier lock or (master) subsidy lock is a technical restriction built into GSM and CDMA mobile phones by mobile phone manufacturers for use by service providers to restrict the use of these phones to specific countries and/or networks. This is in contrast to a phone (retrospectively called SIM-free or unlocked) that does not impose any SIM restrictions.

SIM lock - Wikipedia
After unlocking, all data on the device is erased, that is, both private app data and shared data accessible over USB (including photos and movies). Before attempting to unlock the bootloader, back up any important files on the device.

The original use of the term 'informal sector' is attributed to the economic development model put forward in 1955 by W. Arthur Lewis, used to describe employment or livelihood generation primarily within the developing world.It was used to describe a type of employment that was viewed as falling outside of the modern industrial sector. An alternative definition from 2007 uses job security as ...
